

**CONCORDIA UNIVERSITY**  
**FACULTY OF ENGINEERING AND COMPUTER SCIENCE**  
**APPLIED ADVANCED CALCULUS -- ENGR 233 -- Section S -- Winter 2020**

---

**Section S: Lectures:** Wednesday and Friday from 8:45 to 10:00 in FG C080 SGW

**Instructor:** Dr. D. Dryanov; **Office:** LB 901-16; **E-mail:** [dimitar.dryanov@concordia.ca](mailto:dimitar.dryanov@concordia.ca); **Tel:** 32-24

**Office Hours:** Wednesday from 3:30 pm to 5:00 pm and Friday from 10:30 to 12:00 in LB 901-16

**Tutorials:**

**Subsection SA:** Monday from 8:20 to 10:00 in H 501 SGW

**Subsection SB:** Wednesday from 1:15 pm to 2:55 pm in H 501 SGW

**Subsection SC:** Monday from 8:20 to 10:00 in H 459 SGW

---

**Course coordinator:** A. Nazemi      **Office:** EV 6.164

**E-mail:** [ali.nazemi@concordia.ca](mailto:ali.nazemi@concordia.ca)

**WeBWorK administrator:** Siavash Hedayati Nasab

**Email:** [siavash.h.n@gmail.com](mailto:siavash.h.n@gmail.com)

---

**Lectures:** three hours per class. **Tutorial:** two hours per week.

**Prerequisite:** MATH 204 (cégep Mathematics 105) previously or concurrently; MATH 205 (cégep Mathematics 203)).

**Textbook:** Advanced Engineering Mathematics, by Dennis G. Zill and Warren S. Wright, 5<sup>th</sup> or 6<sup>th</sup> Edition, Published by Jones and Bartlett.

---

**Course Description:** This course introduces first year engineering students to multivariable calculus and its applications to mathematical models.

The main topics include: Vector functions; Functions of several variables; Differential vector calculus; Integral calculus for vectors; Double and triple integrals; Line and surface integrals; Stokes' Theorem; Divergence Theorem; Applications in applied science and engineering.

---

**Grading Scheme:**

- |                          |   |
|--------------------------|---|
| 1. Assignments (WeBWorK) | 10%   |
| 2. Pop-up Quizzes (5)    | 10% (2% each, during lectures or tutorials, 20 min, 1-2 problems)         |
| 3. Team projects (2)     | 5% (2.5% each, 1 hour; during tutorials in teams of 2 or take home)       |
| 4. Term tests (2)        | 20%, (10% each, during tutorials, 60 min each, see next page for details) |
| 5. Final exam            | 60% (3 hours)   |

**The grading scheme implies 5% bonus. However, maximum combined mark for the first three components (WebWork + Quizzes + Projects) is 20%.**

**YOU MUST PASS THE FINAL EXAM (50% or better) TO PASS THE COURSE**

**In the event of extraordinary circumstances beyond the University's control, the content and/or evaluation scheme in this course is subject to change.**

---

**WeBWorK:** Every student will be given access to an online system called WeBWorK. Students are expected to submit assignments online using WeBWorK. Late assignments will not be accepted. Assignments contribute 10% to your final grade. Working regularly on the assignments is essential for success in this course. Students are also strongly encouraged to do as many problems as their time permits from the chapters of the textbooks listed below in this outline.

- The WeBWorK administrator is Siavash Hedayati Nasab email: [siavash.h.n@gmail.com](mailto:siavash.h.n@gmail.com), any questions related to WeBWorK assignments should be directed to him.

- Students are also responsible for topics covered in assignments that have not be presented in either the regular lectures or during tutorials.

#### General rules:

- If the student misses one mid-term test for any reason, including illness, then the final examination will count for 70% of the final grade.
- Since there is a 5% team projects bonus allocation, there will be no replacements of quizzes for any reason, including illness.
- Students are responsible for finding out the date of the final exam. The Examination Office posts the time and place of the final exam once the schedule becomes available. Any conflicts or problems with the scheduling of the final exam must be reported directly to the Examination Office. Students are expected to be available until the end of the final examination period. Conflicts due to travel plans will not be accommodated.

**NOTE: Electronic communication devices** (including cellphones) **will not be allowed** in examination rooms. Only "Faculty Approved Calculators" will be allowed in examination rooms [SHARP EL-531 or CASIO FX-300MS].

#### GRADUATE ATTRIBUTES

ENGR233 emphasizes and develops the CEAB (Canadian Engineering Accreditation Board) graduate attributes and indicators: Knowledge base for engineering -Problem Analysis (Problem identification, Modeling, Problem solving) -Life-long Learning.

#### COURSE LEARNING Outcomes (CLOs)

Upon successful completion of ENGR233, the students will be able to:

- Apply multivariable calculus to engineering problems. Extract all the pertinent information *vis-à-vis* the physics and practicality of the problem. This component is examined through an applied problem in the final exam.
- Learn how to work within a team. This is done through one or two Team Projects.
- Acquire new knowledge by self-study. This is accomplished by making students responsible for certain material on assignments and exams, without that material being lectured on.

**Tutors and Markers Info will be updated. In addition, at the beginning of the first tutorial, the tutor should announce the needed data (see below):**

**Tutor Subsection SA:** Name, E-mail, Office

**Tutor Subsection SB:** Name, E-mail, Office

**Tutor Subsection SC:** Name, E-mail, Office

**Marker:** Name, E-mail, Office

#### Schedule, topics and recommended problems:

**Week 1-Jan 6:** Review of the following topics:

- 7.1 Vectors in 2-space; problems: 1,21,30,41,50
- 7.2 Vectors in 3-space; 11,24,32,34,52
- 7.3 Dot product: 12,15,23,29,31, 41,48
- 7.4 Cross product: 3,13,22,28,41,42,45,49,52

**Week 2 Jan 13:** 7.5 Lines and planes in space: 5,12,17,24,33,36,39,49,57,61,66,75

- 9.1 Vector functions: 1,4,10,18,25,34,36,39,42,45

**Week 3 Jan 20:** 9.2 Motion on a curve: 4,9,11,13,14,19,22,27,28,29

- 9.3 Curvature. Components of Acceleration: 1,6,9,16,17,20,23

<b>Week 4 Jan 27:</b>	9.4	Partial derivatives:	2,3,6,9,15,21,24,26,27,36,39,42,48,49,51,55,56,57
	9.5	Directional derivative:	3,6,12,14,15,18,24,27,28,33,41,43,44
<b>Week 5 Feb 3:</b>	9.6	Tangent planes and normal lines:	3,4,14,15,25,34,39
	9.7	Curl and Divergence:	7,11,15,21,24,27,30,39,40,43,44
<b>Week 6 Feb 10:</b>	9.8	Line integrals	3,6,9,15,21,25,27,28,30,33,36,40
	9.9	Independence of path	3,6,15,18,21,24,26,27,28,30
<b>Week 7 Feb 17:</b>	9.10	Double integrals:	3,5,9,15,18,21,24,27,33,36,39,42,45,52,62,65,68

**Week 7/8: Term Test 1** (1-hour exam during tutorials: )

**on material Chap 7 + Sections 9.1 through 9.7**

<b>Week 8 Feb 24:</b>	9.11	Double integral in polar coordinates:	3,6,11,12,19,24,27,29,30,33,34
	9.12	Green's theorem:	3,4,6,8,12,18,19,23,24,25,27,33
<b>Week 9 Mar 9:</b>	9.13	Surface Integrals:	2,4,6,8,10,11,15,17,18,24,28, 29,32,33,36,37,39
<b>Week 10 Mar 16:</b>	9.14	Stokes theorem:	3,4,6,9,10,12,13,14,18

**Week 10/11: Term Test 2** (1-hour exam during tutorial )

**on material of Section 9.8 through Section 9.12**

<b>Week 11 Mar 23:</b>	9.15	Triple Integrals:	3,6,9,13,14,15,21,23,24,27,32,34,45,48,
<b>Week 12 Mar 30:</b>	9.15	Triple Integrals:	51,54,57,68,69,72,75,76,78,81
	9.16	Divergence theorem:	2,3,6,9,11,12,13,15,17,21,22
<b>Week 13 Apr 6:</b>	9.17	Change of variables in multiple integral:	3,5,7,8,9,10,13,15,17,22,23,25,27
<b>Time permitted :</b>		Review:	1-20,24,26,29,30,32,36,38,43,46,50,51,53,54,56,57,58,60,63,65
